

# ANUSKA GUPTA

AI & Data Science Undergraduate | Machine Learning & Applied AI

Kanpur, India | +91 73985 01852 | anuskaguptaf55@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#) | [LeetCode](#)

---

## SUMMARY

AI & Data Science undergraduate (CGPA 8.42/10) with hands-on experience building and deploying machine learning models in healthcare and computer vision contexts. Comfortable across the ML lifecycle — data cleaning, feature engineering, model training, and deployment via Flask REST APIs. Ranked Top 7 nationally in a prompt engineering competition. Looking for an AI/ML internship or entry-level role where I can contribute to production ML systems.

---

## EDUCATION

**B.Tech, Artificial Intelligence & Data Science** *Sep 2024 – Present*

KPR Institute of Engineering and Technology, Coimbatore, India | CGPA: 8.42/10.0

---

## TECHNICAL SKILLS

**Languages:** Python, Java, SQL

**ML / AI:** Scikit-Learn, TensorFlow, Predictive Modeling, NLP fundamentals, Computer Vision

**Data:** Pandas, NumPy, OpenCV, Feature Engineering, EDA, Data Wrangling, Power BI, Tableau

**Tools / Infra:** Flask, REST APIs, Docker, Git, PostgreSQL, MongoDB

---

## EXPERIENCE

**Machine Learning Intern** | Smart Bridge Educational Services (Remote Program) *Nov 2025 – Jan 2026*

- Built a clinical anemia-detection pipeline in Scikit-Learn on a 1,000+ record dataset, applying feature engineering, imputation, and SMOTE to address class imbalance.
- Tuned model hyperparameters and preprocessing steps to measurably improve classification accuracy over the baseline model.
- Deployed the trained model behind a Flask REST API to serve real-time predictions through a simple web interface.

**Java Application Developer Intern** | Oasis Infobyte (Remote Program) *Oct 2025 – Nov 2025*

- Built an Online Examination System in Java with role-based authentication and automated grading.
- Optimized SQL queries and data access patterns for a Library Management System, improving query response time.

---

## PROJECTS

**Hemosense — AI-Powered Clinical Anemia Detection** | Python, Scikit-Learn, Flask, REST API

- Trained a multi-feature classifier on clinical health-indicator data to flag likely anemia cases, using SMOTE to correct class imbalance in the training set.
- Wrapped the model in a Flask REST API so predictions can be requested in real time from a lightweight browser front end.

**Real-Time Student Engagement Analytics** | Python, OpenCV, TensorFlow, Computer Vision

- Built a computer-vision pipeline using OpenCV and a deep learning classifier to estimate student attention level from live video.
- Generated automated engagement reports intended to give instructors an objective signal alongside classroom observation.

---

## LEADERSHIP & INVOLVEMENT

**Content Writer** | Ignitron Club House, KPR Institute of Engineering and Technology *Jul 2025 – Present*

- Write copy and social content for club events and technical activities, and coordinate with the team to promote engagement across the student community.

---

## CERTIFICATIONS

- Python for Data Science — IBM (2025)
- Data Analytics Job Simulation — Deloitte / Forage (2025)
- Top 7 Nationally — Prompt Master AI Competition (2025)
